Software engineer and AI product builder with private- and public-sector experience spanning enterprise ERP systems, applied ML, and end-to-end product ownership – from architecting production multi-agent AI systems to shipping full-stack customer-facing platforms.

Professional Experience

Meihua Group

Hebei, China

Software Engineer (Enterprise Systems & AI Applications)

Sep 2025 – Present

- Own the full lifecycle of the company's overseas SAP rollout (PP, QM, SD/MM) across US, China, Japan, Germany, and Singapore offices – process mapping, system design, configuration, master-data governance, and user training through post-launch optimization – delivered in 7 months despite differing languages and business processes across five countries; spent 3 months on-site in Cape Girardeau, MO leading the US team (Plumino Precision Fermentation Inc.) through training and system tuning.
- Lead a cross-border data transfer compliance program spanning EU GDPR, US Illinois (BIPA/PIPA), Singapore PDPA, China PIPL, and Japan APPI across 5 jurisdictions – now drafting the resulting policy documents with legal counsel.
- Manage cross-border IT infrastructure (VPN tunnels, AWS networking) enabling HQ–subsidiary integration for overseas operations; built an internal LLM/RAG tool for colleagues to query business-process documentation and system manuals in plain language, also used for new-employee training.

Coordinating Ministry for Maritime Affairs and Investment

Jakarta, Indonesia

Consultant (Project Management & Dashboard System)

Aug 2021 – Sep 2022

- Owned requirements and design for project monitoring dashboard, translating executive reporting needs into features used to track cross-agency initiative progress and support decision-making.
- Facilitated inter-ministerial collaboration – organized bilateral meetings and business forums; provided CN–EN–ID interpretation.

Kompas R&D

Jakarta, Indonesia

Data Analyst (Research & Applied Machine Learning)

Apr 2020 – Jul 2021, continued part-time through 2025

- Conducted qualitative and quantitative research and built ML models for structured data analysis, most notably a candidate electability-prediction model for Indonesia's 2024 regional elections (see Projects); delivered visualizations, reports, and articles regularly published on the Kompaspedia platform.

AI & Data Science Projects

AI & Agentic Systems

- EJ*: Designed and directed AI-assisted development of a production multi-agent personal AI assistant on Claude (Opus/Sonnet 4.6) – agent orchestration, RAG, tool integration (Gmail, Google Workspace, Telegram), and persistent memory (SQLite), served via a FastAPI dashboard. Adds Whisper voice transcription and an RSI/volatility-based market-analysis skill with automated trade execution via Alpaca.
- Guagua*: Built on the same multi-agent platform as EJ for team leaders at Meihua client Plumino; in daily production use, automating issue tracking, email follow-up, and monthly report/slide generation.
- Lauren's Pâtisserie Web & Mobile App* (www.laurens-patisserie.com): Directed end-to-end product design and AI-assisted development of a full-stack e-commerce platform live in production – Next.js storefront, Flutter mobile app, and a NestJS/Prisma/PostgreSQL API with JWT auth, Midtrans payments, and WhatsApp/email/Telegram order notifications; used order and customer data to drive product decisions.
- Face-Pay*: Building a face-payment wallet prototype, with a nutritionist, for mall food-court payments – liveness detection and face recognition on local ONNX models, PIN-confirmed transactions on an append-only ledger, Fernet-encrypted biometric storage. In development.
- Aerie Daily*: Building an agentic pipeline that drafts, self-verifies, and sends a daily newsletter teaching AI agent development – Claude-driven drafting across three sections sourced via live web search, with an independent verification pass blocking sends on fabricated claims or format violations.

Applied Machine Learning

- 2024 Indonesia Regional Election Electability Prediction* (Kompas R&D): Predicted win probability for 1,553 candidates across 545 races in Indonesia's 2024 simultaneous regional elections (37 provinces, 415 regencies, 93 cities) using a discrete-choice (conditional logit) model with softmax-normalized win probabilities per race, augmented via generative AI to offset historical data scarcity.
- Movie Recommendation Engine* (Harvard Data Science Capstone): Built a MovieLens recommender in R (10M ratings, 27,000 movies, 138,000+ users), iterating from baseline/bias models through regularization and matrix factorization to RMSE 0.80 on held-out data.
- Wine Quality Classification* (Harvard Data Science Capstone): Built and evaluated Logistic Regression and KNN classifiers on the UCI/Kaggle Portuguese wine dataset – AUC 0.88 (balanced, KNN) and AUC 0.858 (imbalanced, Logistic Regression), with sensitivity/specificity threshold analysis.
- Smart City Policy Impact Modeling*: Applied the Generalized Synthetic Control Method in R to measure the impact of the ASEAN Smart Cities Network on urban development, using panel data across 500+ municipalities to inform policy decisions.

Skills

PyTorch, TensorFlow, Scikit-learn, RAG, Agentic Systems, LLM APIs (Claude, OpenAI) | Python, R, SQL, REST APIs, FastAPI | Next.js, Flutter, NestJS | SAP ERP (PP, QM, SD/MM), AWS VPC | Data Visualization (Plotly, Flourish, Canva) | English (IELTS 8, TOEFL 104), Chinese, Indonesian, French

Certifications, Training & Bootcamps

Zhihu AI Product Manager: LLM Solutions Expert Bootcamp | Harvard University Data Science Professional Certificate | Harvard University CS50 | IBM Data Science Specialization | IBM AI Engineering | DeepLearning.AI Machine Learning Specialization | DeepLearning.AI Deep Learning Specialization

Education

Tsinghua University

China

M.Sc. in Management Science

GPA: 3.91

Driyarkara School of Philosophy

Indonesia

B.A. in Philosophy

GPA: 3.99

Yupptek University Indonesia

Indonesia

B.Eng. in Electrical Engineering

GPA: 3.92

+86 159 1077 2512 | +62 812 8433 3331 | +1 (646) 249 4508

具备公共部门与私营部门跨领域经验的软件工程师，专注于企业信息系统、AI 应用开发与数据分析，推动流程效率提升与数据驱动决策。

工作经历

梅花集团

软件工程师（企业系统与 AI 应用）

中国河北

2025 年 9 月 – 至今

- 全程主导公司美国、中国、日本、德国、新加坡五地办公室的海外 SAP 系统上线（PP、QM、SD/MM 模块）——从业务流程梳理、系统方案设计，到配置、主数据治理与用户培训，再到上线后优化；尽管五国语言与业务流程差异较大，项目仍在 7 个月内完成上线；驻场美国密苏里州开普吉拉多三个月，带领当地团队（Plumino Precision Fermentation Inc.）完成系统培训与调优。
- 主导跨境数据传输合规体系的初始搭建，覆盖欧盟 GDPR、美国伊利诺伊州隐私法（BIPA/PIPA）、新加坡 PDPA、中国 PIPL 及日本 APPI 共五个司法辖区，目前正与法务顾问共同起草相应政策文件。
- 负责跨境 IT 基础设施建设：VPN 专线、AWS 网络与总部-子公司系统互联，支持海外运营与跨部门业务协作；开发内部 LLM/RAG 工具，供同事以自然语言查询业务流程文档与系统操作说明，亦用于新员工培训。

印尼海洋与投资统筹部

顾问（项目管理与仪表板系统）

雅加达，印度尼西亚

2021 年 8 月 – 2022 年 9 月

- 构建项目监测仪表板，用于问题追踪与进度汇报，支持高层决策。
- 推动跨部门协同，组织双边会议与商务论坛，提供中-英-印尼语口笔译支持。

Kompas 研发中心

数据分析师（研究与应用机器学习）

雅加达，印度尼西亚

2020 年 4 月 – 2021 年 7 月，后转兼职至 2025 年

- 开展定量与定性研究，构建机器学习分析模型，其中最具代表性的是印尼 2024 年地方大选候选人当选概率预测模型（详见项目经历）；定期为 Kompaspedia 平台提供数据可视化、研究报告与文章。

AI 与数据科学项目

AI 与智能体系统

- EJ: 基于 Claude (Opus/Sonnet 4.6)，主导设计并通过 AI 辅助开发完成的生产级个人多智能体助手——智能体编排架构、RAG、工具集成 (Gmail、Google 日历/文档/表格/云端硬盘、Telegram) 与持久化记忆 (SQLite)，并通过 FastAPI 网页看板呈现。额外具备基于 Whisper 的语音转录，以及股票市场分析技能（通过 yfinance 计算 RSI/波动率）与 Alpaca 自动化下单执行。
- 刮刮 (Guagua): 基于与 EJ 相同的多智能体平台，服务于梅花集团客户 Plumino 的团队负责人；已投入日常生产使用，自动化问题追踪、邮件跟进催办、会议纪要与月度报告/PPT 生成。
- Lauren's Pâtisserie 糕点网页与移动端应用 (www.laurens-patisserie.com): 主导全栈电商平台的端到端产品设计与 AI 辅助开发，现已上线运营——Next.js 网页商城、Flutter 跨平台移动应用 (Android/iOS)，以及基于 NestJS/Prisma/PostgreSQL 的 REST API (含 JWT 鉴权、Midtrans 支付集成、WhatsApp/邮件/Telegram 订单通知)；结合订单与客户数据支持产品决策。
- Face-Pay: 正与一位营养师合作，为商场美食广场支付场景开发人脸支付钱包原型——基于本地 ONNX 模型的活体检测（防伪造）与人脸识别，PIN 码确认交易并写入仅追加式账本，生物特征数据采用 Fernet 加密存储。开发中。
- Aerie Daily: 正在构建一套智能体内容管道，用于起草、自我核验并发送讲授 AI 智能体开发的每日通讯——由 Claude 驱动撰写三个板块内容，均通过实时网络搜索获取信息，并设有独立核验环节，一旦发现虚构内容或违反格式规范即阻止发送。

应用机器学习

- 2024 年印尼地方大选候选人当选概率预测 (Kompas 研发中心): 预测印尼 2024 年地方同步大选中 545 个地方职位 (37 个省、415 个县、93 个市) 共 1,553 名候选人的当选概率，采用条件 Logit (判别式选择模型) 框架，通过 softmax 将同一职位内候选人得分转化为加总为 1 的当选概率，并使用生成式 AI 对历史训练数据进行合成增强，以弥补数据不足。
- 电影推荐系统 (哈佛数据科学毕业项目): 基于 MovieLens 1000 万评分子集 (27,000 部电影、138,000+ 用户)，用 R 从基线/偏置模型迭代到正则化与矩阵分解，在留出测试集取得 RMSE 0.80。
- 红酒质量分类 (哈佛 EdX 毕业项目): 在 UCI/Kaggle 葡萄牙红酒数据集上构建并评估 Logistic Regression 与 KNN；最佳结果为平衡数据 KNN 的 AUC 0.880，以及非平衡数据 Logistic Regression 的 AUC 0.858，并结合敏感性/特异性进行阈值分析。
- 智慧城市政策影响评估: 使用 R 的广义合成控制法 (Generalized Synthetic Control)，基于 500+ 城市面板数据衡量东盟智慧城市网络 (ASCN) 对城市发展的影响。

技能

PyTorch, TensorFlow, Scikit-learn, RAG, Agentic Systems, LLM APIs (Claude, OpenAI) | Python, R, SQL, REST APIs, FastAPI | Next.js, Flutter, NestJS | SAP ERP (PP, QM, SD/MM), AWS VPC | 英语 (IELTS 8, TOEFL 104), 中文, 印尼语, 法语

证书、培训与训练营

知乎 AI 产品经理：大模型解决方案专家训练营 | 哈佛大学数据科学职业证书 | 哈佛大学 CS50 | IBM 数据科学专项证书 | IBM AI 工程专项证书 | DeepLearning.AI 机器学习专项证书 | DeepLearning.AI 深度学习专项证书

教育背景

清华大学

管理科学硕士

中国

GPA: 3.91

德利亚尔卡拉哲学大学

哲学学士

印度尼西亚

GPA: 3.99

印尼优本科技大学
